## Profile

---

Software developer with hands-on experience delivering and leading CMS-driven web projects across WordPress and Sitefinity environments, including headless CMS architectures. Strong background in full-stack development using React/Next.js and .NET with Entity Framework, combined with practical experience managing Linux-based hosting environments (RedHat, Debian) and cloud infrastructure on Azure and AWS. Experienced in containerising applications with Docker and implementing CI/CD pipelines to streamline deployments and maintain release consistency across environments.

Proven track record of managing timelines, coordinating tasks, and communicating directly with stakeholders to deliver production-ready solutions. Brings a balanced mix of engineering execution, infrastructure awareness, and project ownership.

## Work experience

---

01/2023 – present  
Singapore

### Senior Software Developer WhooshPro Pte Ltd

- Oversaw multiple concurrent projects, driving planning, task delegation, timeline control, and cross-functional execution to ensure on-time delivery.
- Led end-to-end delivery of CMS-driven web projects (WordPress and Sitefinity), from requirement gathering and technical planning to deployment and post-launch support.
- Developed and maintained full-stack solutions using React/Next.js and .NET with Entity Framework, ensuring scalable architecture and clean integration between
- Managed Linux-based hosting environments (RedHat, Debian) and Windows IIS servers, handling deployments, configuration, troubleshooting, and production stability.
- Provisioned and maintained cloud infrastructure on Azure and AWS, including VM setup, environment configuration, and hosting management for client projects.
- Coordinated directly with stakeholders to define scope, manage timelines, assign tasks, and ensure on-time project delivery.

06/2022 – 12/2022  
Kuala Lumpur, Malaysia

### Software Developer (Intern) Arvato Systems Malaysia

- Contributed to internal web application development using Spring Boot (Java 8/11/17) and Angular with TypeScript, supporting API development and responsive UI implementation.
- Implemented CRUD operations with Spring Data JDBC, managed database interactions (PostgreSQL/MySQL), and handled schema versioning using Liquibase.
- Performed API testing (Postman/Swagger), wrote unit tests (JUnit/Mockito), and collaborated via Git/Bitbucket in an Agile team environment

02/2020 – 04/2020  
Kuala Lumpur, Malaysia

### Software Developer (Intern) Intsoft Solutions Sdn Bhd 720724-H

- Developed web applications using C# (ASP.NET) and PHP within Apache/XAMPP environments, supporting secure and scalable client solutions.
- Built cross-platform mobile applications using C# (Xamarin), contributing to consistent user experiences across devices.

## Education

---

09/2020 – 11/2022  
Kuala Lumpur, Malaysia

### **Bachelors in information technology (Honours) in Software System Development, Tunku Abdul Rahman University College, Kuala Lumpur**

- Courses included Mobile Application Development with Kotlin and Firebase, Advance Computer Networks, Advance Database Management System with MongoDB and SQL Plus, Data Structure Algorithms with Java, Web Development with ASP.NET and SQL LITE.
- Obtained a CGPA of 3.53.

04/2018 – 04/2020  
Kuala Lumpur, Malaysia

### **Diploma in Computer Science and Management Mathematics, Tunku Abdul Rahman University College, Kuala Lumpur**

- Courses included C language Programming, Object Oriented Programming with Java, Web Development with HTML and CSS and Database Management System, Applied Mathematics included Advanced Calculus and Advanced Mathematics.
- Obtained a CGPA of 3.6.

## Side Project

---

### **Government Portal Prototype**

**Next.js 14 · TypeScript · Directus (Headless CMS) · PostgreSQL · Tailwind CSS · Jest · Docker**

- Built a content-driven public portal using server-side rendering and ISR for SEO performance and CDN-level scalability
- Integrated a headless CMS with a typed API client, enabling non-technical editors to manage news, categories, and page content without code changes
- Designed schema with singleton and relational collections; implemented paginated news listing with category filtering

### **Personal Finance Dashboard**

**React · TypeScript · ASP.NET Core 8 · PostgreSQL · Docker deployed to Fly.io · CI/CD via GitHub Actions · Google OAuth SSO.**

- Full-stack personal finance dashboard with Google SSO authentication, featuring real-time budget tracking, savings goals, and spending analytics with interactive charts
- Built with React/TypeScript frontend and ASP.NET Core 8 REST API backed by PostgreSQL, with EF Core 8 for data access, containerized with Docker and deployed to Fly.io via GitHub Actions CI/CD pipeline
